Secret Gardens

Workshop mit **Noel Paine**

We make boxes out of cardboard, quite simple and inconspicuous from the outside - but with beautiful gardens inside. These gardens are hidden, only through a small spy hole one will be able to see them. As these will be *secret* gardens, the outside can be simple, contrasting all the beauty inside!

Aims

Children will learn basic design and planning of a 3D-project, how to cut card and build constructions. They will learn watercolour, the importance of mixing colours and how to record "information" with a pencil quickly in the landscape. Finally this workshop aims to develop a child's love of drawing from nature.

Teaching method

We will begin the project with a visit to a park in Vienna (yet to be decided, most likely Schönbrunn) where the children will sketch trees, bushes, flowers, pathways... These small sketches will be used as an inspiration for their secret gardens. Back at the studio at Zeichenfabrik, the children will plan their boxes and decide how they wish their garden to look inside the box. The children will then paint all their boxes and carefully design the inside, using watercolours and coloured crayons. The children will be able to add small animals, creatures and characters entering the box from the sides. The gardens can be based on reality or fantasy: the children will be allowed to let their imaginations take over!

Target audience

This course is highly adaptable to all levels of ability and aimed at children aged 8 to 12.

Teaching language

English

Termine

07.07.2020 - 10.07.2020

Täglich 10-14 Uhr

€ 216 inkl. Kursmaterial

Kursort

Zeichenfabrik
OG 1, Kursraum 1
Flachgasse 35-37
1150 Wien

Kursleitung
